## New Camera Slider System

The MYT 3 in 1 system is meant for adding dolly like camera moves without having to lay tracks. Ideal for documentaries, lifestyle television, factual, corporate and any productions where smaller crews and faster shooting pace are required.

### What's in the MYT system:

- 4ft glider for smooth dolly movements
- Camera skater that can roll on floors, tables, sidewalks, etc.
- Hi-Hat with 100mm bowl
- Can take up to 80 lbs of camera from Canon 5D to a fully rigged RED Epic
- Custom built lightweight transport case
- Quality made in NYC

I added this system to my equipment inventory to give an added value to my clients' productions. The slider can take up to 80 lbs of camera and sets up in minutes. Will fit in a normal sized vehicle. The slider itself weights less then 12 lbs; the whole kit, including the case, is less then 30 lbs and makes it airline friendly.
