Like if I accidentally exit the app, it can restart the whole game, make this magenta colored screen, or basically kick me out of the battle I'm in and take control of my team with AI saying "Catching up to present". Also, Ludia, I think the game can have a few more features like: alliance peace treaty's/alliance friends and alliance wars/conflicts, and betting like for Cash, coin or DNA in battles and stuff like that. Doing that can buy you some time and avoid a KO, but a swap means your opponent gets a free attack on you, so it's something you should only do in an very unfavorable matchup or when it's desperation time. Since every dinosaur has its own stats and set of abilities, it's beyond the scope of this Hack to dive too deep into team composition. In 2016, we witnessed the enormous success of Pokemon GO - the first game to successfully use virtual reality technology VR (virtual reality). What is this technology? This is a technology that enables graphics in the computer to interact with the real world. Moreover, this virtual world is not static, it can change according to your actions such as gestures, voice. You can simply understand that, as long as you have a smartphone, you can see anything through the phone screen that you feel like seeing them in real life.
