### Personal Summary

Jordan Shaw is an artist and creative technologist. An MFA graduate from OCAD University's Digital Futures program, his interests spans mediums ranging from strictly digital to interactive physical environments. His work explores themes relating to the influence of technology in popular culture and the predefined expectations society has about their relationship with computers, technology, and the future. The manifestation of his creative output transpires through projects that focus on communicating the invisible, yet very physical components of technology and how these unnoticed pieces of technology impact, influence and alter our behaviour and surroundings.
