For your convenience, the photographs have been thoughtfully curated into specific categories.

Visions of Nature

The Power of Black & White

Imaginative Abstracts

Aerial Views

Slices of Life

Seascapes

Sand and Water

Architecture

# Visions of Nature

Living in a place without art is like living without the sun. These windows into the natural world celebrate the poetry of our planet... the flora, the fauna, the exquisite details as well as the vast breathtaking horizons of Mother Nature and her shifting times and tides.

# The Power of Black & White

Black and white. Sepia. Simply soothing monochrome palettes can unify all the elements and add a timeless quality to anything from retro-era inspiration to a high-tech happening-now theme. Monochromatic photography captures emotion, contrast, and mood.

# Imaginative Abstracts

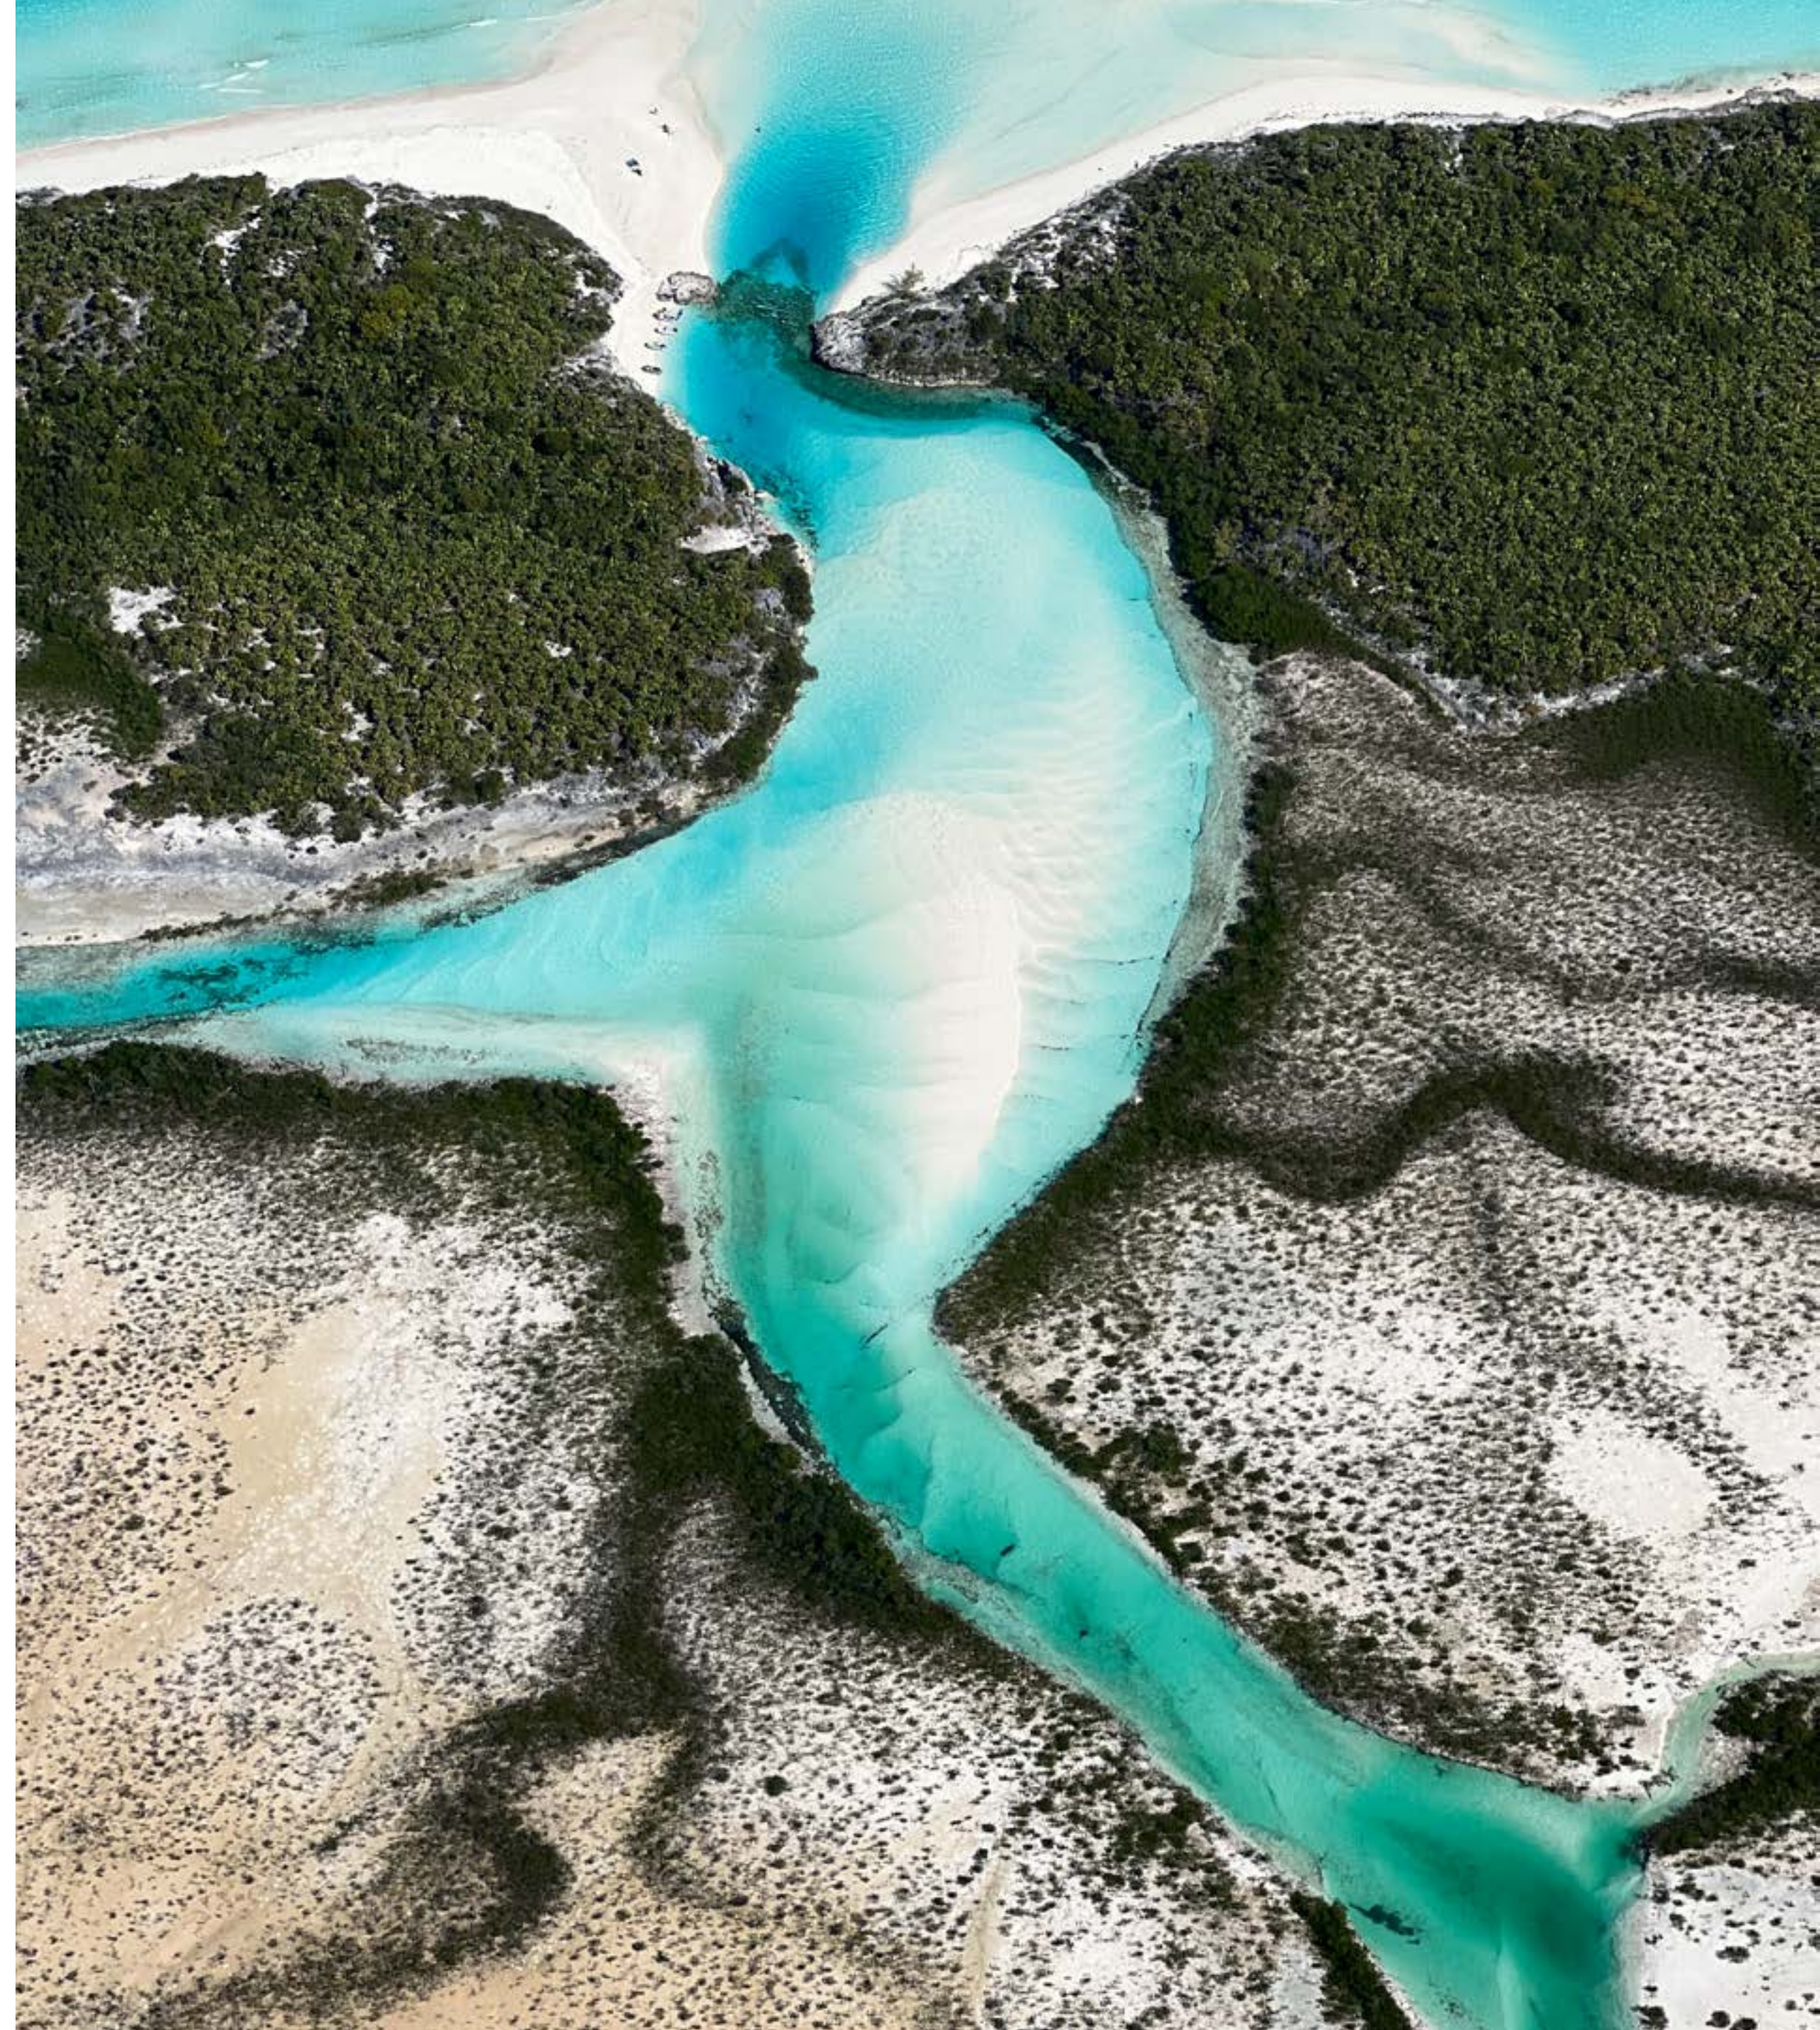

Abstract photography captures the unseen—an impression in the sand, a flight of fancy, the glimmer of dappled sunlight on water. It merges visual inspirations into evocative compositions, stirring open interpretation and spirited musings, where meaning flows freely and imagination shapes what the eye alone cannot define.

# Aerial Views

Aerial photography offers a unique perspective, capturing landscapes, architecture, and urban patterns from above. These striking visuals enhance spatial storytelling, adding depth and sophistication to design concepts. Perfect as wall art or design inspiration, aerial imagery brings scale, contrast, and a modern edge to any interior space.

# Slices of Life

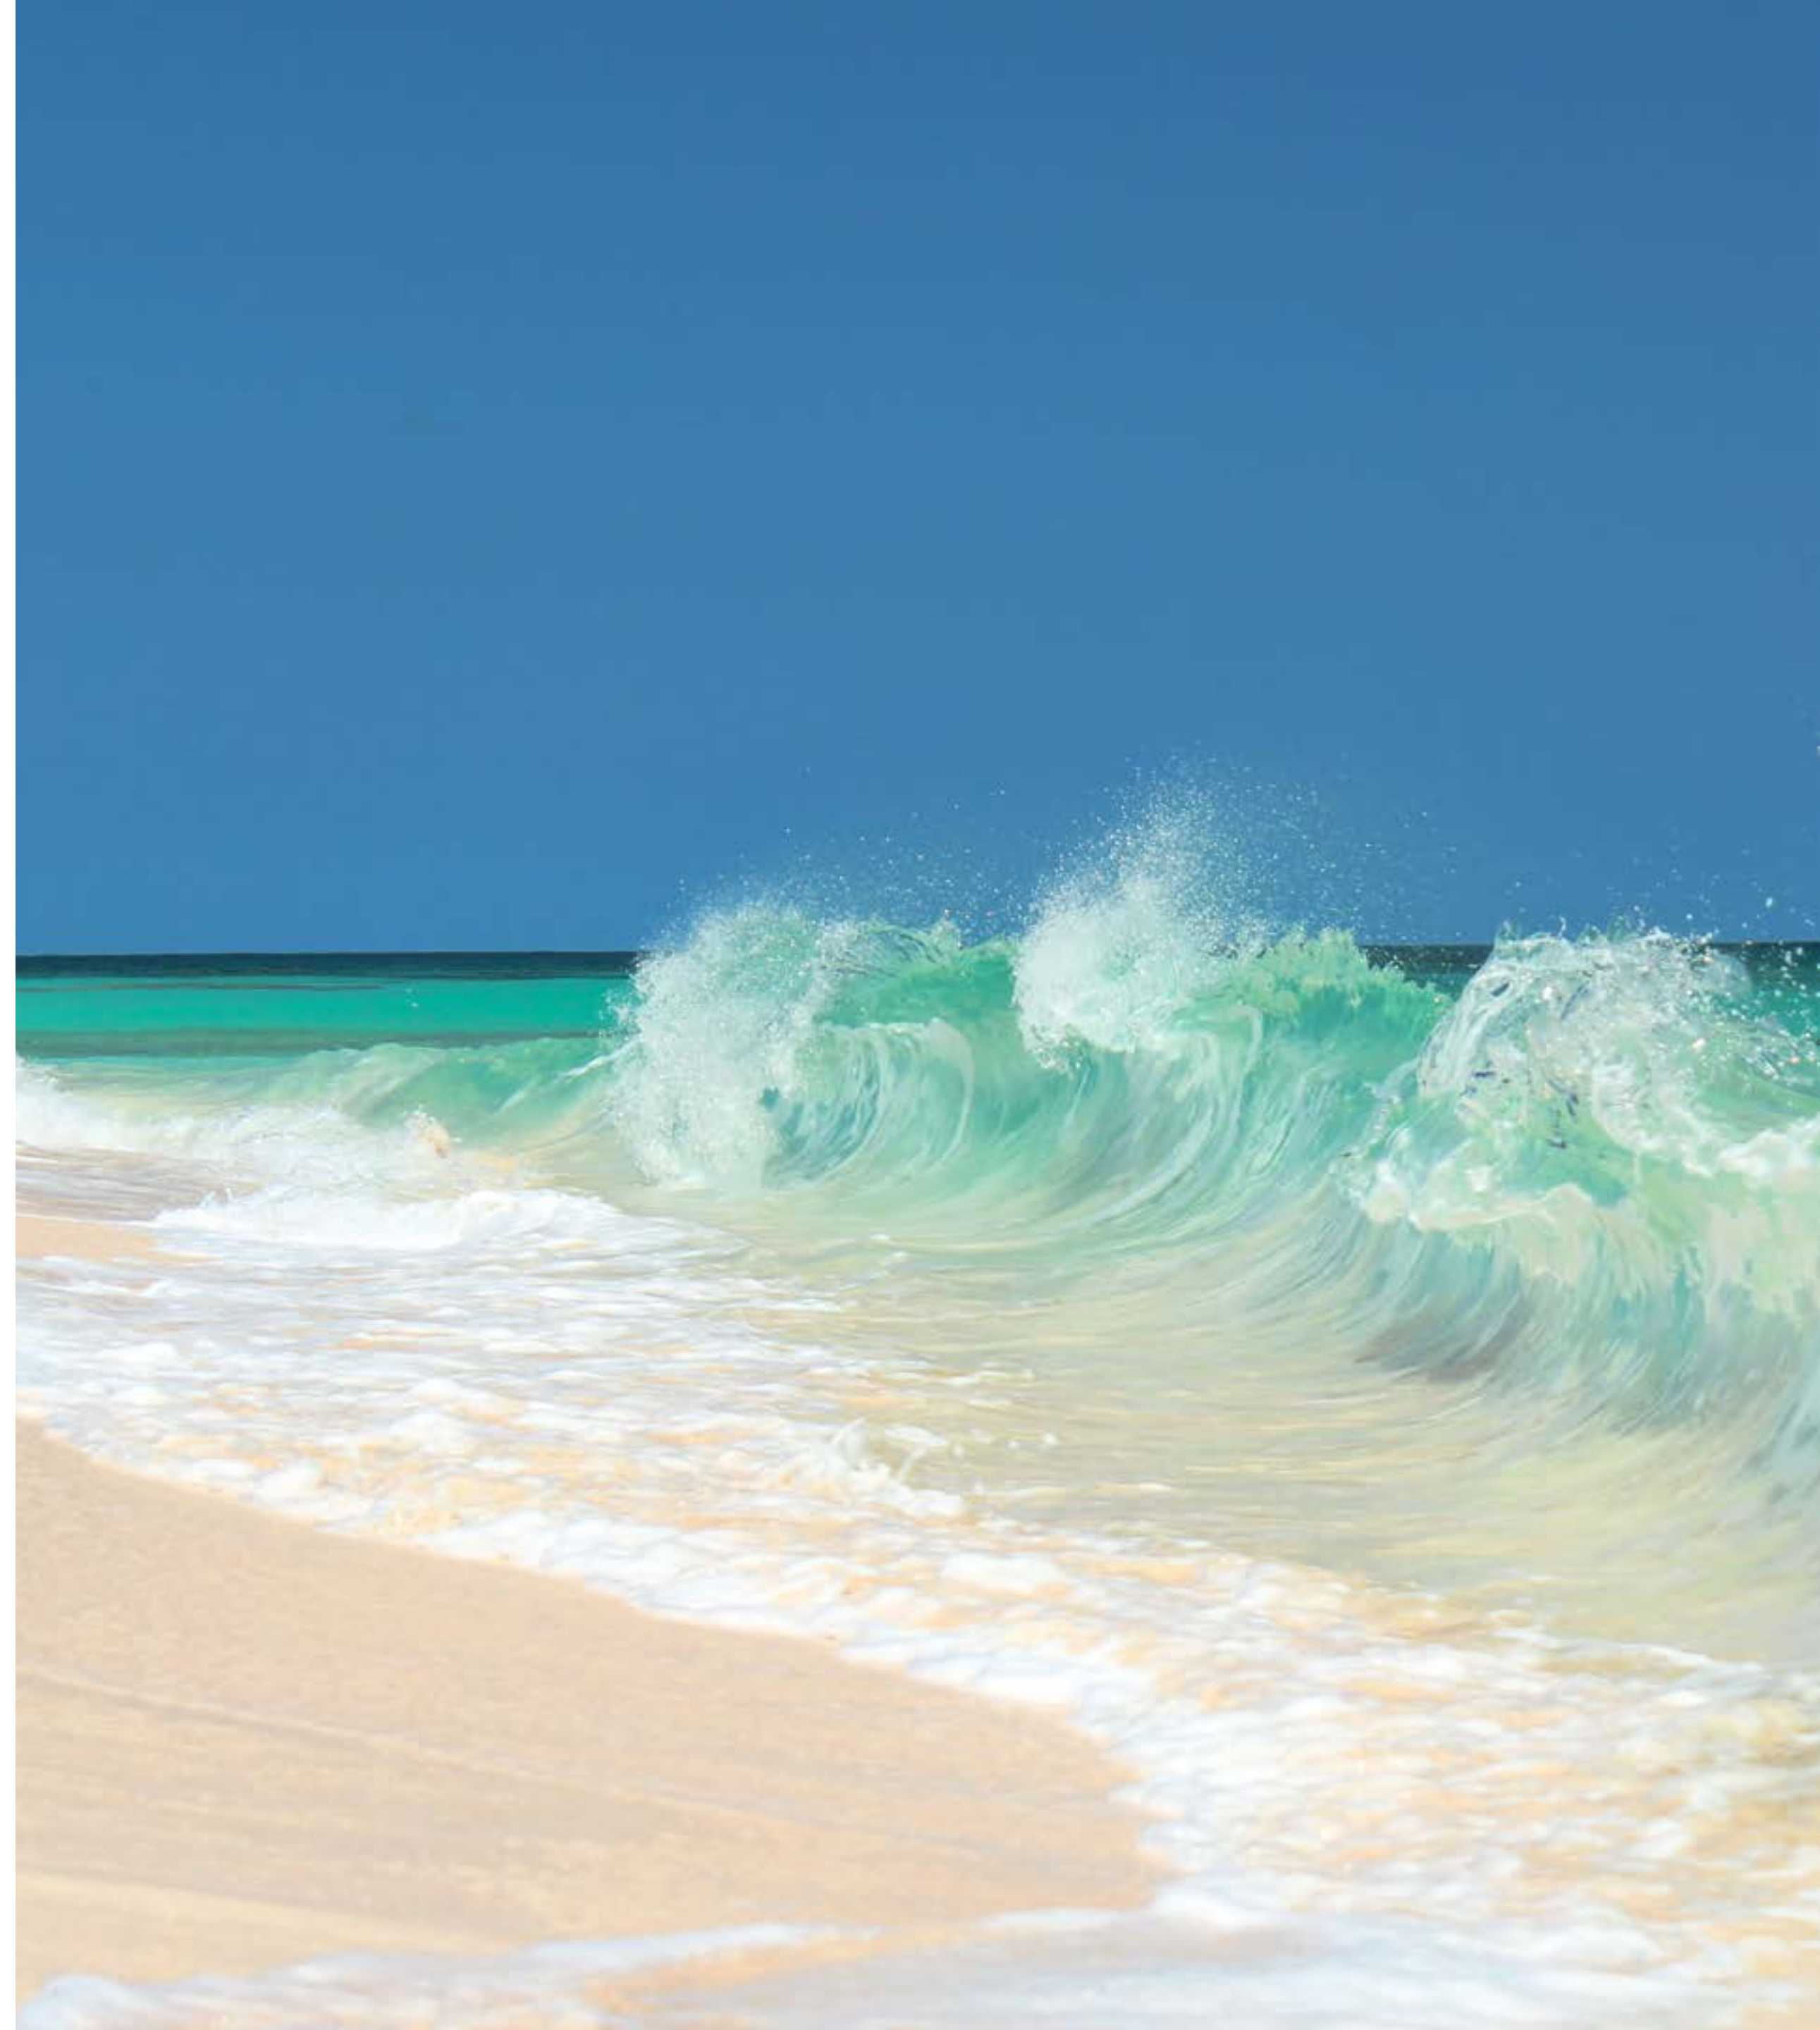

Slice of life photography in the Bahamas and South Florida captures the sweet bright moments of simple island life—sunlit smiles, ocean breezes, and barefoot joy. These candid glimpses bring lively pops of pure bliss, celebrating everyday beauty, vibrant culture, and the warmth that makes coastal living feel effortlessly magical.

# Seascapes

Bahamian seascape scenes offer timeless inspiration—evoking serenity and renewal. Time and again we are drawn to the sea: waves of change, tidings of sun and sand, blue as far as forever. These horizons of hallelujah bring depth and calm. Use large-format prints for statement walls, gallery clusters for coastal themes, or soft-toned pieces to complement minimalist spaces. Perfect for entryways, bedrooms, or lounges, seascape photography invites tranquility and visual escape.

# Sand and Water

Photos of sand and water reveal nature's quiet poetry—ocean rhythms etched in flowing patterns, liquid pools of clear possibility, the shifts and sighs of the sea. These serene visuals add elegance to any home or commercial space, inviting calm, openness, and organic texture through large prints, framed sets, or wall murals.

# Architecture

Caribbean style architecture photos showcase vibrant colors, colonial influences, wooden shutters, and tropical surroundings. Interior designers use these images to infuse spaces with warmth and coastal charm. They guide color palettes, furniture choices, and architectural details for relaxed, sun-soaked, island-inspired interiors.

# Image Samples

The following pages offer a glimpse into my photography.  
Each image is clearly labeled by category, along with some technical details.

## Lifeguard Shack

- **Gloss canvas on stretcher frame**
- **Fine Art canvas print (premium quality)**

## PHOTO PRINTS

An extensive choice of Premium papers

- **Fine Art Photo Prints (Giclee)**
- **Standard Gallery photo paper**

# Bio

**“Vision is the art of seeing what is invisible to others. Each Photograph is a chapter of our story the visual of our thoughts and feelings.”**

Jonathan Swift

Alessandro Sarno is a photographer born and raised in Italy. Seventeen years ago he made his first trip to The Bahamas, and it was a trip that

changed his life. Mesmerized by the incredible blue waters, he was compelled to buy his first camera. What started out as a short vacation transformed into a deep love for both photography and for the The Bahamas and South Florida, where he still feels most inspired to capture everyday moments of life. Sarno has published several coffee table books portraying life in the islands and Miami. Sarno's photography focuses on the details and crossroads of daily life: community gatherings, worship services, wildlife, vistas of solitude, rhythms of connection, a forgotten corner, an unexpected treasure, small details illuminating humanity's vastness.

His personal notes and thoughts on exploring and finding the people and places that make for a more memorable and deeper visitor experience (beyond the usual routes) are found in his unique curated photographic books: The Exuma Cays Land & Sea Park and in Eleuthera, White Bull on the Highway and Fond Memories. His passion for travel and being in the moment opens Sarno up to fully experiencing the places and people he meets along the way. “I believe that once a scene or portrait is captured and framed into a photograph, it is elevated to a higher dimension, to a limbo between reality and imagination. It becomes visual poetry, where words are replaced by shapes, spaces, colors, lines, light, and shadows.” Enjoying the distinctive energy of each new person or landscape he encounters, Sarno considers photography his ongoing travel companion. His artistic name, “The Lonesome Photographer” draws inspiration from the classic road-less-traveled book, Lonesome Traveler, by novelist and poet, Jack Kerouac.
