

The concept model was inspired by the geometric vs natural forms found in both woodworking and cycling. I've represented both in the different forms of the wind tunnel when cycling, and landscape behind the bike.

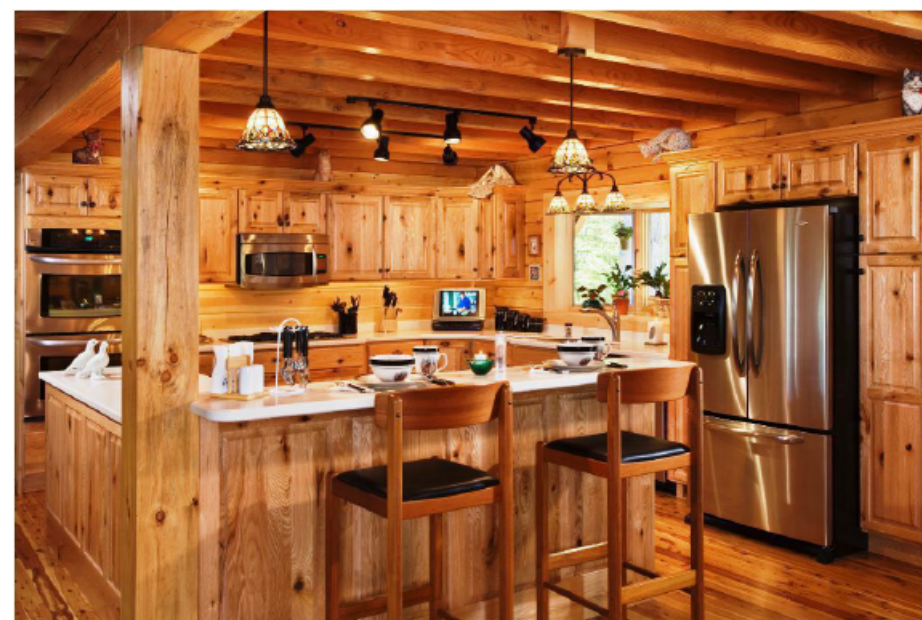

My design choice for the hobby space was inspired by a retired architect, turned woodworker, Frank Howarth. His workspace and creations inspired me to make a warm living space that brought people together.

Frank makes

My design choice for the work space was inspired by 2 different bike shops, those being BikeDepot and ZM Cycle. Both obviously had many bicycles inside them, but I wanted to put emphasis on the facade and form of the interior, so I followed my concept too in the use of different shapes
