Getting Around

The Faroe Islands are comprised of 18 smaller islands. We will be using a comfortable minivan for the tour. Access between the main islands is made easier by four subsea tunnels:

Vágatunnilin, Norðoyartunnilin, Eysturoyartunnilin, and Sandoyartunnilin.

Vágatunnilin connects the western island of Vágar (Airport) to the island of Streymoy (capital Tórshavn).

Norðoyartunnilin connects the northern island of Borðoy (Klaksvík) to the island of Eysturoy (Leirvík).

Eysturoyartunnilin connects the island of Streymoy with Eysturoy (two towns: Strendur and Runavík). Streymoy with the island of Sandoy.

The drive from our accommodation in Tórshavn to most of our destinations takes less than an hour. The airport to Tórshavn is around 45 minutes.

Weather

Dress for windy days with potential for rain and snow. The average maximum temperature in February is 5°C (41 °F).

The roads are regularly cleared if snow falls.
